

Connecting Communities-Growing Futures

We want to create a peaceful space to nurture togetherness and wellness for the whole community.

In the Municipality of Banyule there is a need to provide an inclusive place whose focus is to develop and train unemployed, nurture social groups and educate our children and community.

Our Community Environment Park will be a sustainable educational garden and cafe that will enhance learning opportunities for students as well as grow relationships with other community groups, individuals, educational institutions in an attempt to create a community hub around our school and Parish through and with an emphasis on food, and sustainable projects/initiatives

Our Community Environment Park will re-instate St Pius X school's rightful place in the community and create a school without walls!
